Axis Companion VMS

Professional video surveillance made simple

AXIS Companion is a complete solution that brings the reliability of professional video surveillance to small business owners. You get affordable cameras to cover most common surveillance situations, a network video recorder to store video, an easily operated video management software and a secure remote access to your system from any location.

With AXIS Companion business owners can tap into the benefits of video surveillance. From real time monitoring, to resolving conflicts, preventing and reducing theft and even remote store visits, video surveillance with AXIS Companion is a simple and

secure task. You can control your business at any time from any location, and with high video quality both in daylight and night time, business owners can be in control of their operations at any time from any location.

- Compact recorder with integrated PoE switch
- Easy to install and operate
- Surveillance-grade hard drive
- USB port for exporting video
- 5-year warranty

Easy to expand

A solution with AXIS S3008 is easily adapted to your business, and seamlessly expands as your needs grow. You can add additional recorders and other Axis devices to your installation. For instance, it's possible to add network speakers to communicate with staff and deter intruders or network video door stations for audiovisual identification and remote entry control.

Optimized for basic surveillance needs

AXIS Companion video management software is designed for small businesses needing to monitor their premises, people and assets. It offers quick and easy system setup and intuitive operation.

Available at any time, from anywhere

Axis Secure Remote Access technology allows users easy access to live or recorded video on a mobile device or PC with no need for network or router configuration.
